SUMMARY

Full Stack Engineer with **5+ years** of experience building scalable web applications and AI-enabled systems across backend and frontend platforms. Strong expertise in **Python/Django, Angular, React**, distributed task processing, search infrastructure, and production-grade integrations, with proven impact in platform reliability, test coverage, and performance optimization.

WORK EXPERIENCE

Full Stack Engineer, Xref (Australia)

Dec 2023 - Present

- Led feature delivery and critical issue resolution across enterprise and recruiter platforms, improving product stability and enterprise workflow support.
- Designed and maintained scalable backend APIs in **Django**, improving maintainability and supporting enterprise feature expansion.
- Increased automated test coverage from **45% to 80%** across backend and Angular frontend through structured test implementation.
- Built **AI-powered summaries** within reference check workflows to improve readability and reduce manual review effort.
- Integrated a knowledge-base chatbot to support internal information retrieval and user assistance workflows.
- Delivered performance-focused backend and frontend improvements across production systems.

Software Engineer, Cheetay Logistics (Lahore)

Mar 2021 - Dec 2023

- Developed scalable APIs with backward compatibility across logistics and ERP workflows.
 - Integrated Bank Alfalah **payment gateway** for secure transaction processing.
 - Built **Elasticsearch** based indexing and search APIs for operational data retrieval.
 - Implemented **Redis** caching and **Celery** task automation to improve response times and background process reliability, significantly reducing latency in critical workflows.
 - Integrated **Sentry** and **Elastic APM** for production monitoring, error tracking, and performance diagnostics.
 - Developed internal dashboards using Django Jinja templates and AJAX-based interactions for operational management.
-

PROJECTS

MemogentAI (In Progress)

Built an AI-powered financial document analysis pipeline for due diligence using OCR, RAG-based retrieval, and precision extraction from Excel, PowerPoint, and scanned documents. Integrated fine-tuned agents and validation workflows to generate structured financial due diligence reports.

Cheetay Admin App

Developed an internal admin platform for managing products, inventory, deals, CMS content, and operational workflows, enabling centralized control for marketing and operations teams.

Referees in Talent Pool – Xref

Migrated referee check workflows from recruiter to enterprise platform to reduce operational cost and improve platform adoption. Implemented filtering, report downloads, and scheduled report email delivery for enterprise users.

Roles and Permissions System

Designed and implemented a role-based access control system for enterprise clients, enabling custom role creation and permission assignment across teams, inspired by Amazon Web Services IAM principles.

Sentiment Analysis System

Social Media Sentiment Analysis Tool Built a sentiment analysis system using Python and Django to retrieve and classify tweets and social media posts as positive, negative, or neutral. Utilized natural language processing (NLP) techniques to provide insights into public sentiment and trends on various topics.

EDUCATION

Bachelor of Computer Science

Aug 2018 - Apr 2022

National University of Computer and Emerging Sciences
(FAST NUCES, Lahore)

TECHNICAL SKILLS

- **Languages:** Python, SQL, TypeScript, JavaScript
 - **Frameworks:** Django, Angular, React
 - **AI/LLM:** RAG, LangChain, LangGraph, NLP, OCR
 - **Data & Search:** Elasticsearch, Redis, OpenPyXL
 - **Cloud & DevOps:** Docker, AWS, Git, Celery
 - **Testing & Monitoring:** Pytest, Sentry, DataDog
-
